## مطارات

### مطارات.. شريك أساسي لتحقيق الاستدامة، الابتكار، الازدهار في قطاع الطيران والمطارات

كشركة رائدة في قطاع الطيران والمطارات، نمتلك ٢٥ مطارًا ونعمل على إدارة الشركات المشغلة لهذه المطارات: شركة مطارات الرياض، وشركة مطارات الدمام، وشركة مطارات جدة، وشركة تجمع مطارات الثاني (Cluster ٢)، كما تولينا في مطارات دورنا الريادي في تحويل قطاع المطارات إلى فرص استثمارية واعدة وتعظيم الاستفادة من الأصول القائمة، وتقديم تجربة مميزة للعملاء، وتطوير بنية تحتية مستدامة، وتقديم مزايا قيمة للمستفيدين.

تتمثل رؤيتنا في تطوير المطارات السعودية وتحويلها إلى بوابات اقتصادية مزدهرة من خلال قيادة جهود التخصص والتحول لتمكين قطاع مستدام.

## EVENT INFORMATION

**Exhibition Timings:**  
17-19 May 2022, 10:00 – 18:00

#### Admission to the Exhibition:

Free entry for trade visitors only. The Organiser reserves the right to refuse entry. Children under 16 will not be admitted.

#### Canvassing:

No giveaways may be distributed or displayed in any part of the exhibition except with written permission from the Organiser. Exhibitors' giveaways are permitted only on their stands. Brochures are recommended to be provided digitally through QR codes.

#### Car Parking:

Paid parking is available at Za'abeel Plaza Parking, Happiness Street Parking, Exhibition Street Parking behind Rashid Hall, and in Sheikh Rashid Tower Car Park next to Arena Hall.

#### Catering:

The following outlets will be open to contractors/exhibitors:

- Traders House, (Concourse 2) May 15th – 20th
- Arena Café, (Concourse 1) May 16th – 19th
- Traders Express, (Hall 4) May 17th – 19th

It is not allowed to bring any food or beverages from external sources into the premises during build-up, event days and tear-down.

#### DWTC Exhibitor Services Shop "EventPlus":

Located at Concourse 1, next to Hall 2. EventPlus ensures that all DWTC products and services like internet, catering, cleaning and rigging (pre-ordered or new orders) placed by exhibitors are delivered during the event. It is open during build-up and throughout the opening hours of the exhibition.

Tel. +971 4 308 6333.

#### First Aid:

The Emergency Medical Services station is located Concourse 2 opposite to hall 5. Please call +971 4 306 4040 to speak to the on-duty medic for assistance or look for the nearest member of the DWTC security staff.

#### Hosted Buyer Lounge:

The Hosted Buyer Lounge is located within Hall 3.

#### Lost Property:

The Lost and Found office is located on Level 1, above Hall 8. Tel.: +971 (0)4 306 4600

#### Organiser's Office and Information Help Desk:

The Organiser's office is in Office 3.2 of Hall 3 entrance and the information help desk is located at the foyer area of Hall 3.

#### Press Centre:

The Press Centre is located at Organiser Office 4.2 at Hall 4.

#### Prayer Rooms:

Female Prayer Room is above Sheikh Maktoum Hall and Male Prayer Room is Above Sheikh Rashid Hall. (There are signage on the elevators that takes you to the prayer rooms)

#### Restrooms:

Ladies and gents restrooms are available throughout the venue. Look for "You-are-here" boards or a copy of the floor plan for the nearest facilities.

#### Taxis:

A taxi rank and pick up and drop off is located in front of the Convention Gate. Contact +971 4 2080808 to get a taxi from Dubai Road Transport.

#### Prohibitions:

The Organiser reserves the right to refuse admission to the exhibition without assigning any reason and to order the expulsion of any person whose conduct, in their opinion, renders such a course of action appropriate.

#### Photography:

Not allowed unless permitted by the Organiser.

#### Disclaimer:

The Organiser and the publishers of the official catalogue accept no responsibility for inaccurate or misleading information supplied by the exhibitors, nor for any errors or omissions that may occur, however caused.

## Welcome to Airport Show 2022!

We are delighted to welcome you to the 21st edition of The Airport Show. Held under the patronage of His Highness Sheikh Ahmed bin Saeed al Maktoum, President, Dubai Civil Aviation Authority, Chairman, Dubai Airports and Chairman and Chief Executive, Emirates Airline and Group and are supported by Dubai Civil Aviation Authority, Dubai Airports, Dubai Aviation Engineering Projects and dnata.

As we welcome over 150 brands from 20+ countries with 6 national pavilions of leading suppliers and manufacturers of airport products, we bring you three days of the latest innovations, business opportunities and engaging expert discussions. You will also see the largest live display of electrical – environmentally friendly ground handling equipment at the e-Apron, where leading manufacturers were gathered in partnership with dnata.

Airport Show and its co-located events, ATC Forum and Airport Security will also welcome some of the biggest regional delegations in the Business Connect Programme which will bring together over 80 senior airport decision makers, representing some of the most progressive airports in the region. On the other hand, the Global Airport Leaders' Forum (GALF) offers 20+ hours of thought-leadership content across ATC, ground handling, sustainability, air traffic management, and airport security which will be presented by more than 40 regional and international speakers.

On behalf of the show team, we thank our supporters, partners and this edition's Platinum Sponsor, Matarat and Sponsor Smiths Detection and we wish all attendees a productive experience at the show.

Sincerely,  
**Firas Abu Ltaif**

## AIRPORT INNOVATION & DEVELOPMENT

Airports have always been at the forefront of innovation, experimenting new technologies faster than most other industries in their pursuit to enhance operational efficiency and passenger experience. However, COVID caused the largest ever disruption to the industry in its history and caused it to rethink many of the innovations and developments it had planned. The pandemic, combined with climate change, evolving passenger requirements, emerging technologies that are beneficial yet threatening at the same time and changing regulations, have caused airports to rethink what future development looks like. The Airport Innovation & Development conference at GALF 2022 will help airport leaders prepare for the return to growth, putting innovation and passengers at the centre of their strategies.

10:00 am to 11:00 am

Registration / Networking

11:00 am to 11:15 pm

Welcome Address / Opening Ceremony

H.E. Jamal al Hai, Deputy CEO, Dubai Airports

11:15 am to 11:30 am

Keynote Address: (topic tbc)

Eng. Mohammed Ahmed al Mowkley, CEO,  
Matarat Company, Saudi Arabia

Moderator: Arsh Shearif, Aviation Specialist

11:30 am to 12:30 pm

Panel Discussion: Adopting data, AI, 5G and robotics to  
rethink the passenger experience.

Passengers around the world are becoming increasingly demanding on service levels and experiences at airports. Social media allows travellers to comment, like and dislike their experience and share it with millions instantly. In this session we will look at some of the latest innovations in technology that can provide an opportunity for airports to thrill and entertain their passengers.

Tom Eskola, Vice President & General Manager, Panasonic Avionics Corporation

Jacques Khoriaty, Middle East Chief Commercial Officer and Aviation Director, Egis

Gabriele Ruggieri, Global Aviation Senior Manager, Custom Spa

Moderator: Arsh Shearif, Aviation Specialist

12:30 pm to 01:30 pm

Panel Discussion: Advances in integrated, automated,  
electric mobility in the airport environment.

With the expected boom in aviation over the next few decades, airports, ground handlers and ANSPs will be required to match capacity expansions at airlines. Expansion comes at a huge cost, financially and to the climate. Aviation has therefore been increasingly looking towards integrated, automated, electric mobility to minimise costs and enhance efficiency. New technologies offer substantial fuel savings for airline partners, reduced emissions and improved air quality at airports, decreased noise, safer taxiing operations by reducing collisions and higher airport throughput increasing capacity without large additional expansions. The development of the electric vehicle market also provides an opportunity to advance airports as infrastructure assets for electric generation, as electric buses and cars are linked together to transfer power with each other and store electricity.

Robert Powell, Vice President Technical Services, dnata

Francesco Sperandio, Transport and Mobility Senior Director, RINA Consulting S.P.A.

Andrea Bombelli, International Sales and Marketing Manager, Bombelli Srl

Raghu Seelamonthula, Director – Strategy & Growth, Airside & Tower Systems,  
Honeywell

Moderator: Arsh Shearif, Aviation Specialist

01:30 pm to 02:30 pm

Panel Discussion: Making innovations in design, ambience and  
operations a key element of the airport development strategy.

Airports today are more than just transit facilities for air travellers. They are mega hubs, competing for discerning customers to be engines of economic growth for the cities they serve. Airport design has changed considerably in the last few decades and developed aviation markets require the most urgent upgrades (e.g. the average airport in the world's largest aviation market, the US, is 40 years old). Pre-pandemic, global airport infrastructure development up to 2030 was estimated at US\$1 trillion, and new airports and upgrades must be innovative and adopt the latest technologies, processes and design to ensure they deliver the flexibility, ambience and efficiency required from them for several decades.

Abdullah Al Shamsi, Senior Director of Future of Things, Dubai Aviation Engineering Projects

Dr. Debora Cazzani, Marketing & Export Manager, MC SOLUTIONS

Ramesh Cidambi, Chief Operating Officer, Dubai Duty Free

Giulio De Carli, Managing Partner, One Works

Moderator: Orkun Altintas, Director Consulting - Aerospace & Defense (EMEASA), Frost & Sullivan

02:30 pm to 03:30 pm

Panel Discussion: Preparing for future urban air mobility

The growth of urban air mobility, using highly automated aircraft that can operate and transport passengers or cargo at lower altitudes within urban and suburban areas, is gaining traction globally and will be an integral part of the future travel experience. As the sector takes off, aviation, transport and city planning authorities are preparing the infrastructure to meet projected growth. In this session we will look at vertiports in more detail and regulation, infrastructure planning and growth forecasts for the urban air mobility sector.

Damian Kysely, Head of Infrastructure, Europe and Middle East, Skyports

Raghu Seelamonthula, Director – Strategy & Growth, Airside & Tower Systems

Joyce Abou Moussa, Innovation Project Manager, ADP

Moderator: Arsh Shearif, Aviation Specialist

03:30 pm End of Day

## AIR TRAFFIC MANAGEMENT

As global aviation restarts after the COVID pandemic, the sector is experiencing a huge surge to return to 2019 traffic and a period of sustained growth thereafter. The industry is expected to double passenger numbers in less than two decades, with middle income consumer growth in over half the world's developing economies and new airlines and airports being developed in every part of the world. Ensuring efficiency in the sky is imperative to meeting air passenger growth on the ground. COVID provided the air traffic sector a much needed opportunity to analyse performance gaps and prepare future strategies for how the sector can harness new, more sophisticated technologies. The Air Traffic Control conference at GALF 2022 will bring together global aviation leaders and ATC experts to discuss the key issues that will define and enhance ATC operations over the next several decades

10:00 am to 11:00 am

**Registration / Networking**

11:00 am to 11:30 am

**Welcome Address / Opening Ceremony**

**Ibrahim Ahli**, Deputy CEO, Dubai Air Navigation Services

11:30 am to 12:00 pm

**Keynote Address:** UAE regulatory developments to facilitate future growth and emerging technologies

Post COVID, the industry must work across all aspects of aviation to standardize regulations and spur growth.

**Mohammed Faisal Al Dossari**, Senior Director Air Navigation and Aerodromes Department, UAE GCAA

12:00 pm to 12:25 pm

**Keynote Address:** Disrupting ATM to support recovery of the industry

Air Traffic Control can play a huge role in reducing carbon emissions by adopting new technologies that can help airlines plan more efficient routes and work with other stakeholders to help reduce the overall carbon footprint.

**Yahya Abdalla AlHammedi**, CEO, Global Air Navigation Services (GANS)

12:25 pm to 13:25 pm

**Panel Discussion:** Protecting your airspace from drone incursions and other vulnerabilities

New technologies are bringing in new, more sophisticated threats for ANSPs. The Middle East – like so many other parts of the world, has seen major disruptions to flight operations and billions of dollars lost in revenue, due to recreational drones alone. In this session we will look at some of the latest airspace vulnerabilities that ANSPs are preparing for and how they are mitigating these.

- **Dr. Omar Kaddouha**, Director Flight Safety, Directorate General of Civil Aviation, Lebanon
- **Mark Green**, Head ANS Projects, Global Air Navigation Services (GANS)
- **Eric Wernsperger**, Solution Sales Manager – Remote Digital Tower Technologies, Frequentis

**Moderator:** **Khurram Qureshi**, Project Specialist, Dubai Air Navigations Services (DANS)

13:25 pm to 14:25pm

**Panel Discussion:** Building a Digital Sky to meet future ATM challenges

Digitalisation has created enormous efficiencies across the aviation supply chain and provides a clear path for the ATM industry to build a more scalable, resilient, climate friendly airspace that is able to accommodate a growing number of aircraft and new air vehicles.

- **Muayyed Al Teneiji**, Acting Director – Air Traffic Management, General Civil Aviation Authority
- **David Shomar**, Vice President, Civil Security, Middle East & North Africa Operations, SAAB Inc.
- **Ivan Baruta**, Principal Consultant, Egis

**Moderator:** **Sudarshan Avadhany**, Head of Sales – ATC, Rohde & Schwarz GMBH & CO KG

14:25 pm End of Day

## AIRPORT SECURITY

Security will always be a critical component of the air transport industry, which has experienced a disproportional number of security attacks and incidents. While the nature and complexity of security threats has risen with new data driven technologies and significant passenger growth each decade, airport authorities have also been able to build more resilient security infrastructure that is able to monitor millions of passengers' movements from the minute they arrive at the airport to the time they take off. Complex control centres combine AI, advanced biometrics, cyber security, IoT and many other technologies to ensure passenger safety, while at the same time trying to minimise passenger discomfort and delay. The Airport Security conference will host air transport and law enforcement experts to discuss the critical developments in Airport Security that are being rolled out across airports globally.

10:00 am to 11:00 am

**Registration / Networking**

11:00 am to 11:20 pm

**Welcome Address / Opening Ceremony**

**H.E. Major General Mohammed Ahmed Al Marri**,  
Director General, General Directorate of Residency  
& Foreign Affairs – Dubai

11:20 am to 11:40 am

**Keynote Address:** Developing intelligent, end to end control of  
entire airport infrastructures to meet future security challenges

As security threats get more advanced, airports must look at complete end-to-end solutions that are able to detect and mitigate security challenges before they occur. Planning is key to developing an intelligent system that is able to secure the entire airport ecosystem.

**Brigadier: Humooda Mohammed Selayem Alameri**, Deputy Director Of Gen. Dept. Of Airport  
Security, Dubai Police

11:40 am to 12:00 pm

**Keynote Address:** How can advanced, disruptive technologies  
such as AI, machine learning, VR, robotics and data help  
enhance resilience?

Latest innovations in technology are being adopted at the most advanced airports in the world to enhance resilience. This session will help us understand which technologies offer the best long-term solution for airports during a period of sustained growth.

**Eng. Arif Al Janahi**, Director of Security Engineering, Security Industry Regulatory Agency  
(SIRA), Dubai

12:00 pm – 12:20 pm

**Keynote Address:** Hosting air transport and law  
enforcement experts to discuss the critical developments in  
Airport Security that are being rolled out across  
airports globally

**Buti Ahmed Qurwash**, Vice President Security, Dubai Airports

12:20 pm to 01:20 pm

**Panel Discussion:** Building stakeholder collaboration to ensure  
passenger safety and satisfaction is not just the responsibility  
of airports and airlines

Airports need to work closely with multiple national security agencies, including immigration, customs, police, civil defense and other homeland security departments. Collaboration is key to delivering a seamless, efficient and secure passenger journey.

**Charles Yammine**, Manager Security – Quality, Compliance & Excellence, Emirates  
**Sultan Chatila**, Chief Commercial Officer, Honeywell Building Technologies, Middle East,  
Turkey and Africa

**Federico Lorenzo Forte**, Public Relations Manager, ForteSecurGroup

**Moderator: Arsh Shearif**, Aviation Specialist

01:20 pm to 02:20 pm

**Keynote Address:** How are 'Smart Travel' initiatives  
contributing to better security management

Smart travel initiatives that provide innovative, sustainable and effective solutions for passengers and airports, also offer better security management through the use of advanced technologies and innovations.

**Raed Al-Idrissi**, Acting CEO, Saudi Ground Services

**Moderator: Arsh Shearif**, Aviation Specialist

02:20 pm End of Day

## AIRPORT SUSTAINABILITY

Aviation Sustainability has been an important concern for many years with ICAO, IATA and ACI members pledging their commitment towards reducing emissions as the sector expands faster than most other forms of transport and trade. While airlines and OEMs have been much more public in promoting their sustainability programmes, airports have also made huge strides towards cleaner air transport and committed (under the aegis of ACI) to reach net zero carbon emissions by 2050. Individually many smaller airports have already achieved net zero or will do so by the end of this decade. The Airport Sustainability conference at GALF 2022 will look at the world's leading airport sustainability initiatives and hear from leaders at the world's most environmentally friendly airports on best practices and valuable insights.

10:00 am to 11:30 am

Registration / Networking

11:30 am to 12:00 pm

Keynote Address: Drones for CNS Maintenance

Using a drone to complement of ILS / VOR ground and flight measurements: Skyguide's experience after more than four years of successful operational use proves its value by paying back in real environmental and financial benefits. Skyguide's CNS Drone prevents a substantial amount of CO2 emissions and (nighttime) noise by saving expensive flight check hours, while minimizing runway downtime.

Skyguide's CNS Drone, based on extensive experience and a high level of achievements, has opened new horizons in terms of ILS/VOR measurement techniques: for preventive and corrective maintenances, and for commissioning of new ILS's as well. Following ICAO DOC 8071, the excellent correlation enabled a flight check reduction by over 50% in Switzerland, with civil and military regulator approval! More than a complement to flight check, it is a key enabler for reduction of the CNS maintenance costs, as well as noise disturbance and CO2 emissions

**Gregor Aschwanden**, Senior Product Manager, Skyguide

12:00 pm to 01:00 pm

**Panel Discussion:** Innovations and technologies that can help airports be more climate friendly

From airport design, smart landing technologies, noise management solutions, building energy management systems, LED lighting and electric vehicles to reducing wastage through AI, air quality monitoring and developing on-site renewable energy supplies, airports have a vast range of technologies to help them be more environmentally friendly. In this session, our panel of global experts will discuss the innovations leading the way to greener airports in the future.

**Mohamed Rashid Al Ghailani**, Sustainability Policy & Partnerships Regional Lead - Middle East Turkey and Africa, Boeing

**Andrea Castellotti**, Energy Efficiency and Sustainability General Manager, Seingim Global Service S.r.l.

**Anthony Peter Leon**, Senior Asset Director, Air BP Middle East & North Africa

**Moderator: Sohail Ali**, Senior Vice President - Middle East, Africa, Asia Pacific, British Airways

01:00 pm to 02:00 pm

**Panel Discussion:** How can airport sustainability contribute towards a better passenger experience?

Many innovations in airport technology not only have the potential to enhance sustainability but also offer greater operational efficiency and better passenger experience. Passengers have expressed a strong desire for more automation, contactless and data driven experiences and AI, RFID, robotics, data and other modern technologies that deliver these also offer greater operational efficiency. An increasing number of global air travelers are climate conscious and new technologies offer airports an opportunity to enhance the passenger experience and be more sustainable at the same time.

**Kashif Khalid**, Regional Director - Africa & Middle East Airports, IATA

**Claudio Tomei**, Airport Solutions Responsible, Almagora SpA

**Eng. Stefano Napoli**, Business Development & Engineering, MobiMESH inPiazza s.r.l.

**Giulio De Carli**, Managing Partner, One Works

**Tony Chapman**, Director of Industry Affairs, Alliances and Strategic Initiatives, Collins Aerospace

**Moderator: Sohail Ali**, Senior Vice President - Middle East, Africa, Asia Pacific, British Airways

02:00 pm End of Day

## 12:15 pm to 01:15pm Panel Discussion 1: Implementing New Technologies and Innovations in the Aviation Industry Post Pandemic

COVID-19 has fast-tracked the adoption of technology across the aviation industry. Airports, airlines, ANSPs, ground handlers and all other stakeholders used the pandemic downtime to rethink their operational processes and put in place new technologies that will enhance efficiency and safety once the industry returns to its previous levels. From AI, blockchain, VR, and wearables to automation, robotics and drones the industry has adopted new technology at a faster pace than ever before and will require the next generation of aviation professionals to be familiar with these innovations. In this session we will hear from some of the industry's leading global technology players who will share their experience on the following questions.

- What are some of the latest technologies being adopted by the aviation industry and how will they impact existing processes?
- How will these new technologies empower the workforce, especially women?
- How can the existing workforce be trained quickly to use these new technologies?
- What are the new roles being created in the aviation sector due to the technology shift?

### Panellists:

Dr. Eng. Suaad Al Shamsi, Technical Advisor – Hub Operations and Midfield, Etihad Aviation Group

Jassim Mohamed Al Marzooqi, Human Capital Manager, Strata

Moderator: Kindah Sais, Global Equity, Diversity & Inclusion, Middle East & Africa, Boeing International

## **02:00pm to 03:00pm** Panel Discussion 2: The Role of Aviation Support Services in Industry Growth and Profitability

Aviation Support Services are a critical component of the global aviation industry, providing fuelling, ground handling, catering and many other vital elements of support. These industries offer millions of jobs and have seen parallel growth over the years, in line with the booming aviation markets they serve. Facilitating commercial, general and military aviation – and in most cases serving other industries as well, the sector is lesser affected by events that impact aviation alone and offers career opportunities across multiple industries and global markets. In this session we will hear from experts at Aviation Support Services companies to learn how they performed during the pandemic and what roles they can offer to graduating students and young professionals looking to join the aviation industry.

What role did Aviation Support Services play during the pandemic and how is this expected to change post pandemic? What are the key roles in Aviation Support Services currently that women could apply for? What are the most effective education and training programmes to join the Aviation Support Services industry? What are the new job opportunities expected to open for college students in the Aviation Support Services sector in the next 2-3 years?

### **Panellists:**

**Roula Droubi, Director**, Boeing Middle East & Africa, Government, Industry and Community Engagement  
**Linn Tonsberg**, Director Process Excellence, Air BP  
**Nadia M. Gharaybeh**, Marketing Manager, DC Aviation Moderator: Aida Ismail, Regional Director – Asia, Hadid International Services

**Moderator: Aida Ismail**, Regional Director – Asia, Hadid International Services

## **03:00pm to 04:00pm** Panel Discussion 3: Creating a New Generation of Aviation Professionals

As international aviation sector returns to full capacity and starts preparing itself for the next few decades of growth, the Middle East is once again positioned to be one of the fastest growing aviation markets globally. The region's airlines and airports have shown great resilience during the pandemic and have been at the centre of global trade and vaccine distribution during lockdowns elsewhere. With passenger numbers across the region expected to multiply quickly, supported by mega tourism and economic projects being rolled out by regional governments, the Middle East's aviation sector will create hundreds of thousands of new jobs over the next decade. In this session regional industry leaders will share their market projections and highlight the new roles that they expect to be created.

- What new roles will be required to meet Middle East aviation industry growth up to 2030 and what new skills must be learnt by candidates?
- How has the pandemic changed the way we work and affected our work life balance?
- How can we provide cost effective training programmes to build an aviation workforce locally?
- How can global aviation industry leaders support the Middle East's education and training requirements?

### **Panellists:**

**Bushra Nasr**, Global Cybersecurity Marketing Manager  
**Lilit Tshughuryan**, Managing Director and Trainer, Akademikka Training Institute  
**Dina Al Jafra**, Vice President, WAI-ME  
**Hesham Samir**, Human Resources Consultant, Mohammed Bin Rashid Space Centre (TBC)

**Moderator: Ida Eggeblad**, Global Benefits - Human Resources, Boeing

## **04:00pm to 04:45pm** Panel Discussion 4: Future Forecasts for General Aviation after COVID-19

The last five years saw massive changes in the global aviation industry. From the extremely positive industry forecasts of 2018-2019 to the near complete shutdown of international passenger traffic in 2020-2021 to cautious optimism returning in 2022, the industry has never in its 100 years history experienced such extreme variations. While the pandemic put many commercial airlines out of business and halted airport development across most markets, it also created billions of dollars of new opportunities across the General Aviation sector, with cargo and private aviation making unprecedented revenues and attracting many new players into the industry. As the pandemic effect recedes and commercial aviation returns to its former levels, it is important to recognize the critical role of General Aviation and provide it with the support it needs to sustain the progress it has made in the last two years. In this session key players from across the aviation landscape will share their vision for the General Aviation sector and propose strategies that can help it prosper even further.

- How did General Aviation support global healthcare and economic activity during the pandemic?
- What were the major developments in the sector during this period?
- How can civil aviation authorities and governments support the sector's continued growth and profitability?
- How can General Aviation support Commercial Aviation, especially new players that are just entering the market?

### **Panellists:**

**Asma Khalifa Almheiri**, Head of Aeropolitical & Industry Affairs, Etihad  
**Samantha Rowles**, Operations Director – Transport, SERCO  
• GCAA – (TBC)

**Moderator: Mazen Sabri**, Communications Manager Middle East, Boeing

- WIA Video

## What is e-Apron?

**Airport Show** In partnership with dnata launches the e-Apron.

**e-Apron** is going to be the Sustainability Zone at Airport Show providing an opportunity for electric/hybrid GSE and ground handling equipment manufacturers to showcase and display their latest innovations.

**Participation Options:**

- **Electric/Hybrid Machine Display: AED 900 per sqm**

“

"Reducing our carbon footprint is a key target for dnata as a world-leading air and travel services provider in 129 airports. We invite you to exhibit with us at the e-apron and join our efforts for more sustainable operations."

**Raed Younes**  
VP - UAE & Regional  
Business Development,  
dnata

“

**Contact us today with any questions or if you need assistance!**

Organised by:

**DX** in the business of building businesses

The **2022 Business Connect Programme** welcomed over 100 buyers from 38 airports and aviation authorities of 23 countries.
